Varanasi, Uttar Pradesh, India

Summary

Frontend Developer and MCA final year student with a strong foundation in modern web technologies. Specialized in building highly responsive and interactive user interfaces using **React.js**, **Next.js**, and **Tailwind CSS**. Dedicated to developing scalable web applications with high performance, clean code architecture, and optimized user journeys. Passionate about solving complex UI/UX challenges and staying updated with the latest frontend trends.

Technical Skills

Languages: HTML5, CSS3, JavaScript (ES6+), Python, SQL

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, Vite

Backend: FastAPI, Node.js, REST APIs

Databases: MySQL, MongoDB, PostgreSQL

Tools & Technologies: Git, GitHub, Docker, Postman, VS Code, Vercel, Render

Others: JWT Authentication, TanStack Query, LangChain, LangGraph

Projects

E-Commerce Website  [GitHub](#) [Live Link](#)

Tech Stack: React.js, Tailwind CSS, Vite, React Router

- Developed a responsive e-commerce platform featuring dynamic product browsing, category-based filtering, and seamless navigation.
- Implemented shopping cart functionality using React Context API and state management techniques for real-time updates.
- Integrated RESTful APIs for product management, ensuring efficient data fetching and consistent application state.
- Designed a fully responsive user interface optimized for desktop, tablet, and mobile devices using Tailwind CSS.

AI Health Information Navigator  [GitHub](#)

Tech Stack: FastAPI, LangChain, LangGraph, React.js, Redux Toolkit, TanStack Query, Docker, PostgreSQL

- Developed an AI-powered healthcare platform that analyzes medical reports and symptom descriptions to provide AI-generated health explanations and guidance.
- Implemented JWT-based authentication with Role-Based Access Control (RBAC) for Patients, Doctors, and Administrators to secure protected resources.
- Built a real-time doctor-patient communication module to support consultations and follow-up interactions within the platform.
- Integrated TanStack Query and Redux Toolkit for efficient server-state management, caching, and frontend performance optimization.
- Containerized the complete application using Docker and Docker Compose to simplify development, deployment, and scalability.

Education

GD Goenka University

Master of Computer Applications (MCA)

Gurugram, India

2024 – 2026

Kanpur Institute Of Technology

Bachelor of Computer Applications (BCA)

Kanpur, India

2020 – 2023
